

Ngô Đức Anh

Data Science & Web Development Enthusiast

Ho Chi Minh City, Vietnam

Student ID: ITDSIU24003

Email: itdsiu24003@hcmiu.edu.vn

Skills

- Programming:** Python, SQL, HTML, CSS, JavaScript
- Data & AI:** Machine Learning, Deep Learning, Feature Engineering, EDA
- Systems:** IoT , Automated Trading Systems

Education

Ho Chi Minh City International University (HCMIU) - Data Science

September 2024 to Present

Projects & Experience

DataStorm 2025 Competition - Project "SmartGrocy"

December 2025

- Developed an advanced sales demand forecasting model.
- Analyzed e-commerce patterns focusing on optimal inventory management.

Skills: Machine Learning, Statistical Analysis, Predictive Modeling.

Academic Project - "InsightPM"

October 2025

- Architected database schemas and management pipelines for the PDM course.
- Ensured robust data security and optimized query performance.

Skills: SQL, Database Design, Data Engineering.

Cardiovascular Disease (CVD) Prediction System

November 2025 - February 2026

- Built a Deep Learning pipeline utilizing Explainable AI to predict cardiovascular risks.
- Evaluated model trade-offs to balance precision and recall in medical diagnostics.

Skills: Deep Learning, Explainable AI, Model Evaluation.
